Email: phamtandat655@gmail.com

Mobile: +84-394-047-655

DOB: 10/06/2003

District 5, Ho Chi Minh City

SUMMARY

Backend Java Engineer with experience building scalable service platforms across cloud, domain, healthcare, and subscription systems. Skilled in Spring Boot backend development, RESTful API design, and service lifecycle management. Contributed to improving system maintainability by reducing duplicated workflows, simplifying service models, and supporting consistent multi-domain business logic.

EDUCATION

- Sai Gon University** Ho Chi Minh City, Vietnam
Bachelor of Information Technology Aug. 2021 – Oct. 2025
 - Studied core computer science fundamentals including data structures, algorithms, databases, and software engineering principles.

WORK EXPERIENCE

- Long Van System Solutions** Ho Chi Minh City, Vietnam
Backend Java Developer Dec. 2024 – Present

Core Platform (Domain / Cloud / Service)

- Co-developed a full lifecycle .VN domain management system (registration, eKYC, renewal), supporting VNNIC registrar operations and stable post go-live performance.
- Built Spring Boot REST APIs and automation workflows for VM lifecycle management and data center migration (v1 → v2), reducing manual operations and improving deployment consistency.
- Refactored service lifecycle modules (scaling, renewal, plan changes) to reduce duplicated business logic and simplify maintenance across service flows.
- Contributed to improving service representation models to reduce fragmentation between resource-based and service-based systems, simplifying onboarding and lifecycle management.
- Worked with business and technical teams to clarify requirements, propose and implement backend solutions, and support end-to-end feature delivery.

TRUEDOC Healthcare & SPA Systems (Outsourced Projects)

- Developed multi-tenant subscription management modules supporting complex service lifecycle handling, benefit tracking, and enterprise subscription distribution.
- Implemented domain-specific lifecycle processing for cloud, healthcare, and SPA services while maintaining consistent business rule handling across systems.
- Migrated and enhanced SPA treatment system, supporting full lifecycle flows (prepaid → activated → usage).
- Contributed to improving how service models are represented and managed, helping simplify lifecycle handling across domains.
- Delivered RESTful APIs and an internal admin portal (JSF/PrimeFaces), improving integration and internal operations.

- STECH VN** Ho Chi Minh City, Vietnam
Frontend Developer Intern (NextJS) Sep. 2023 – Jan. 2024
 - Developed a real-time communication platform (chat, group messaging, voice/video) using Next.js/React, integrating WebSocket and encryption for secure, stable communication.
 - Collaborated with backend and media services to resolve real-time synchronization issues.
 - Built reusable UI components and optimized frontend performance.

SKILLS

- Languages:** Java, JavaScript
- Backend:** Spring Boot, Spring MVC, RESTful APIs, JavaServer Faces (JSF)
- Frontend:** ReactJS, NextJS, HTML, CSS, PrimeFaces
- Databases:** MySQL, MongoDB
- DevOps & Tools:** Git, GitLab CI/CD, Jenkins, ArgoCD, Linux
- English:** TOEIC 755/990 (Reading/Listening), TOEIC Speaking 120/200, TOEIC Writing 160/200
